ABOUT ME

A highly independent, hardworking, and self-motivated **Frontend developer** with a strong passion for building innovative, adaptive, and highly optimized web applications. Proficient in **React.js**, **JavaScript (ES6+)**, **Node.js**, and **Tailwind CSS** with a commitment to continuous learning and innovation in web development.

Seeking an opportunity to contribute and grow in a dynamic tech environment!

Education

Bharath Institute of Higher Education and Research Center, Chennai.

2021-2025

Bachelor of Technology in Biotechnology

- CGPA: 9.02

Skills

Technologies: HTML5 | CSS3 | JavaScript (ES6+) | React.js | Tailwind CSS | Node.js

API & Data Handling: RESTful APIs | Axios | Fetch API

Development & Deployment Tools: Git | GitHub | GitHub Actions | Postman | Netlify | VScode

Soft Skills: Effective Communication | Teamwork | Critical thinking | Problem-solving | Adaptability | Time Management

Projects

HealthCare Dashboard | **Live Link** | github.com/harinipriya23/Dashboard-Master

- Developed a responsive healthcare management dashboard to efficiently organize and visualize data for 20+ doctors, 50+ patients, and multiple staff and appointments.
- Utilized React Hooks (useState, useEffect) to manage dynamic states, enabling 100% real-time UI updates and smooth user interactions..
- Implemented interactive data visualization and filtering using Recharts to display key insights on doctor availability, patient trends, and appointment status.
- Improved data accessibility with automated filters, reducing data lookup time by 60%, allowing quick sorting by appointment status, patient gender, and doctor department.
- Incorporated a thorough financial reporting system with revenue tracking, collection summaries, and outstanding balance reports to help with decision-making.
- **Tech stack:** JavaScript (ES6+), Tailwind CSS, Recharts, and React.js.

Restaurant | **Live Link** | github.com/harinipriya2030/Restaurant

- Developed a fully responsive restaurant web application for browsing 70+ menu items, managing carts, and placing online orders, improving the user experience across mobile, tablet, and desktop devices.
- Implemented React Context API for efficient state management, reducing prop drilling by 30% and improving app scalability.
- Designed a modern UI using React.js and Tailwind CSS, optimizing the interface for 100% mobile responsiveness and ensuring seamless cross-device compatibility.
- **Tech stack:** React.js, Tailwind CSS, React Context API, JavaScript (ES6+).

Weekly Weather Forecast | **Live Link** | github.com/Harinipriya2030/WeeklyForecast

- Developed a real-time weather forecasting application with location-based search for 50+ cities, live weather updates, and dynamic UI rendering, ensuring seamless user experience.
- Integrated OpenWeatherMap API to fetch accurate real-time weather data, providing hourly and daily forecasts.
- Implemented React Hooks for efficient state management, improving app performance and enhancing interactivity with 100% real-time updates.
- **Tech stack:** React.js, Tailwind CSS, React Hooks, OpenWeatherMap API, JavaScript (ES6+), API Integration.
